

MAIZE INTENSIVELY

Solution for foliar nutrient and maize stimulation

Better nutrient utilization of basic fertilization

Increased resistance, strength and yield

Zeastim

ZEASTIM®

ACCELERATION OF VEGETATION

- High dose of phosphorus in combination with chelated zinc
- Proauxin stimulants
- Reduces the pH of the spray liquid
- Regeneration after stress and in P and Zn deficiencies

Ingredients: 133 g/l urea N, 475 g/l water-soluble P2O5, 28.3 g/l water-soluble chelated zinc (EDTA), stimulants

Dosage: from the fourth leaf to the beginning of prolonged growth (DC 14-30) 1.5-2.5 l/ha

K3

- Basic NPK combined fertiliser for maize
- High content of phosphorus and microelements EDTA, especially zinc
- Chelates – maximum acceptability for plants
- Combinable also with post-emergent herbicides

P Zn N Cu
K B Mo Ti

Ingredients: urea N 4,3 %, P2O5 14,4 %, K2O 4,4 %, Cu 0,11 %, Zn 1,2 %, B 0,16 %, Mo 0,0016 %, Ti

Dosage: from the sixth leaf stage to the end of flowering 2 - 6 l/ha.

Lister Zn

LISTER® Zn

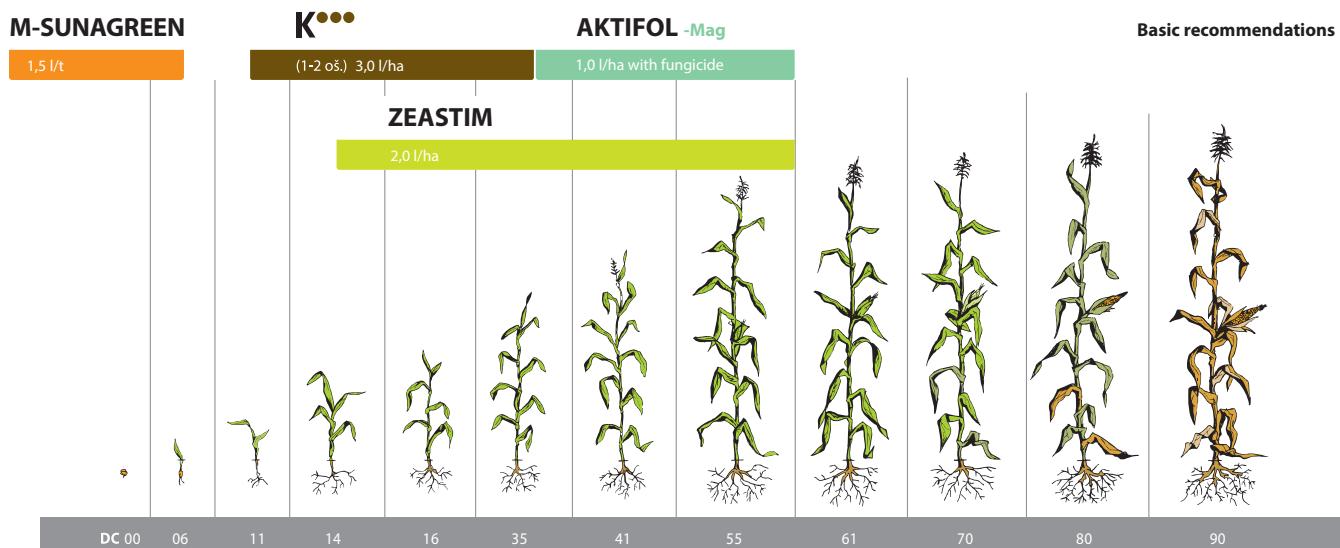

TARGETED NUTRITION

- Zinc chelate concentrate – the most acceptable form
- Covering higher demands in intensive technologies
- Easy combinability with fertilisers and pesticides
- Rapid elimination of possible deficiencies

Ingredients: 75 g Zn/l-water-soluble zinc in chelate (EDTA) bond

Dosage: from the fourth leaf to the beginning of prolonged growth (DC 14-30) 0.7 - 1.8 l/ha
